

EDUPOWER NORDIC INSTITUTE

## OPERATIONAL EXCELLENCE

### interview with Quality and Development Director Kari Hautala

We want to develop as a company with Lean principles. Also customers require us to have a couple of Green Belts and Black Belts in our company.

During the training we had many rewarding discussions and it gave an opportunity to get to know the junior colleagues and their competence better. I gained deeper insights in my own work through the application.

Three words that describe the experience working with EduPower:

The interaction, inspiring, Edupower's competence/ knowledge.

We have gained a deeper customer relationship and better quality work as a result of the training. Now we have increased know-how to carry through our projects by the book and gained more experience. We are creating tools which we are gaining a lot from and that will provide significant benefits to the organisation.

Staff comments from training sessions:

*"My own know-how and most of all understanding has increased. From now on development and implementation will be adopted"*

- Quality and Development Director

*"I have gained a new enthusiasm for development work"*

- Quality Engineer

### Case study

Customer: **MSK Plast Oy**

Year: 2015

Scope: Staff training according to Lean-principles. Lean Six Sigma Green Belt

### MSK Plast Oy

Broad expertise, a versatile product range and an efficient process have made MSK Plast one of Finland's leading contract manufacturers of plastic. Services also include surface finish and the subassembly of reaction molded and injection reaction molded components.
