

EDUPOWER NORDIC INSTITUTE

OSTP

Case interview with CEO Thomas Pettersson

As a result of growing demand from the market when it comes to flexibility and service levels, we have aligned our strategy to improve our operations to ensure we are prepared for the future. In addition to the sales, supply chain, planning and manufacturing processes, the performance and flexibility of our shipping and warehousing department is an important element in fulfilling our strategy.

We used Edupower in our improvement work in the shipping and warehousing department. Edupower helped us with mapping of the AS-IS situation, including personal interviews of our workforce and collection of historical data. Together we built an improvement plan and Edupower also helped us with the first steps turning the plan into actions.

Edupower worked close to our workforce and involved the whole department during the project. Involving the personnel in an early stage is often a success factor in projects like this, when changes in culture and working routines are needed to reach the target.

During the project time we recruited a Warehouse Manager and the outcome from the work with Edupower was of a great help to him when he started.

Comments from project:

"They are explicit with demanding documentation." – Marcus Kjellman, Logistic Manager

"Edupower's work saved me half to one year when I started." – Johan Smedjebacka, Warehouse Manager

Case study

Customer: **OSTP Finland Oy Ab**
Year: 2016
