

EDUPOWER NORDIC INSTITUTE

OPERATIONAL EXCELLENCE interview with CEO Jan Backman

The need to genuinely improve our processes and critically view how we do things, thereby lies a general interest for Lean Six Sigma.

The flexibility and the tailored structure of the course modules are positive. At the same time we got a unique opportunity to make our cooperation in the delivery chain more efficient.

Three words that explain the experience: eye-opening, interesting and networking. To get to speak with other companies about ways to improve, for real. The game day was fun and raised awareness among the staff, there are better and easier ways to do things.

The results we see are that people have gained a critical look and we look at how we can do things in another way. VSM procedure – what creates value? We have gained more substance.

Like the setup with the different modules.

Staff comments from training sessions:

“Interesting, made things clearer for me”. Stefan Backman, Production Manager

“I’ve learned how to identify improvement possibilities and ways to simplify processes”, Charlotte Sandström, Marketing Manager

Case study

Customer: **Fluid-Bag Ltd**

Year: 2014-2015
