After registration an info package will be sent to all participants.

Learn the philosophy adopted by the **Most Successful Companies** in the world, to effectively improve performances in **Productivity, Quality and Timing** at the same time.

The Certified **Lean Six Sigma Master Black Belt** (LSSMBB) is a professional who has exceptionally strong skills in the Lean Six Sigma Methodology, who leads and mentors belts in improvement projects, often in a full-time role. LSS master black belts are exceptional professional problem solvers who have deep understanding of all aspects within the phases of D-M-A-I-C. As such, they provide mentoring to black and green belts and others who need to improve or optimize performance.

Competitiveness today requires more than the traditional quality, price and delivery. Companies need to be fast and flexible well beyond the old standards and be able to constant innovation.

Many of the principles are not so difficult to understand. Successful companies more or less agree that this must happen. Yet many struggle to make it happen. The secret is not in the strategy but in the keys to implementation. We have the keys.

Lean and Six Sigma

Master Black Belt

1. What will you learn in the Master Black Belt module:

- ✚ Lean Six Sigma and DMAIC on enterprise level
- ✚ Building and implementing LSS strategy
- ✚ Lean Six Sigma advanced topics
- ✚ Planning and Leading LSS initiatives

2. Why should you attend and how can you benefit from this course?

In this course, our most competent Lean experts will help you apply the concepts of Lean and Six Sigma on a higher and deeper level with hands on instruction and demonstration based on well-designed practical cases. Learn to design your future enterprise LSS strategy with more impact and reach, plan and implement to make it happen. Advanced techniques to dramatically shorter lead-times and faster new product introduction will be shown hands on and exercised. Participants carry out real projects in their organisations saving in excess of 200 k€.

3. Who should attend?

- Companies
 - Production
 - Management
 - Quality and delivery
 - Finance, HR
 - Research & Development
- Ambitious experts aiming high
- Government and organisations
- High achieving people eager to work most efficient and smart

EduPower customizes this course for professionals who have experience in different product, service or process operations. Whether you are independent business runners, financial controllers or production managers, operation planners or purchasing managers, this course will meet your different needs for improved performance in productivity, quality and timing.
