Lean and Six Sigma Green Belt

1. What will you learn in the Green Belt module:

- ✚ Lean, Six Sigma and DMAIC for operations
- ✚ Management of change
- ✚ Value Stream Mapping, 5S, Simulation, Advanced methods
- ✚ DMAIC – the five phases
 - Define, Measure, Analyze, Improve, Control

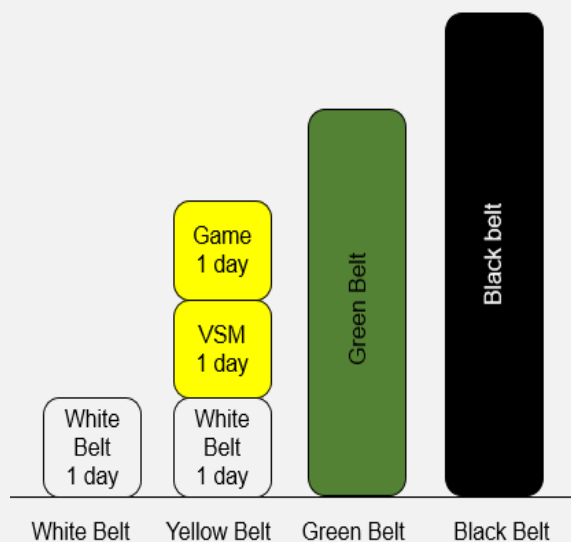

2. Why should you attend and how can you benefit from this course?

In this course, our Lean experts will help you apply the concepts of Lean and Six Sigma step-by-step with hands on instruction and demonstration based on well-designed practical cases. Learn to design your future value stream with more value-added activities, plan and implement to make it happen. Powerful techniques for increasing inventory turnover, dramatically shorter lead-times and faster new product introduction will be shown hands on and exercised. Participants carry out real projects in their organisations saving 50 k€.

3. Who should attend?

- Companies
 - Production
 - Management
 - Quality and delivery
 - Finance
 - HR
 - Research & Development
- Ambitious students aiming high
- Public organisations
- People eager to work more efficient, in a smart way

EduPower customizes this course for professionals who have experience in different product, service or process operations. Whether you are independent business runners, financial controllers or production managers, operation planners or purchasing managers, this course will meet your different needs for improved performance in productivity, quality and timing.
